WATER QUALITY IMPROVEMENT GRANT

SALT STORAGE

Town of Wilton Highway Superintendent Michael Monroe has announced that the Town has been awarded a grant for a new salt shed. The grant is part of the 2025 Water Quality Improvement Projects Grant. On January 15, 2026 Governor Hochul announced that over \$200 million was awarded to 131 projects across the State through the Water Quality Improvement Project (WQIP) grant program. The grants will support projects that protect drinking water, combat contributors to harmful algal blooms, update aging water infrastructure, and improve habitat in communities statewide. The award amount for the town is \$600,000. I would like to thank Saratoga County Soil and Water for helping with the grant process. This is the second grant that I have secured for the Town of Wilton for a total of \$1.5 million.

Michael W. Monroe
Highway Superintendent
